ISO Certified Intrinsic Imaging Core Lab Completes Very Large 12,480 Read Pivotal Oncology Clinical Trial in 5 Weeks

Intrinsic Imaging's services included providing all radiology review of cases by 24 board-certified radiologists and successfully completing the study on-time and on-budget

Bolton, MA / San Antonio, TX

Bolton, MA / San Antonio, TX — March 21, 2018 — Intrinsic Imaging, LLC, an FDA audited and ISO certified medical imaging core lab providing comprehensive services in support of Phase I-IV clinical trials, announces today that it has completed a very large 12,480 read pivotal oncology clinical trial.

Intrinsic Imaging's services included providing all radiology review of cases by 24 board-certified radiologists and successfully completing the study on-time and on-budget within 5 weeks.

Intrinsic Imaging's team includes more than 80 full-time board-certified, fellowship trained radiologists and 224 board-certified consulting radiologists and key opinion leaders. Their expertise includes the full spectrum of oncology imaging and assessments for all indications and they have extensive experience managing international clinical trials involving cancer.

This pivotal oncology trial was conducted within Intrinsic Imaging's ISO certified reading center located in Boston, MA. Intrinsic Imaging has the most comprehensive and sophisticated quality management system in the industry and is the only imaging core lab in the world to hold 5 ISO certifications by the British Standards Institution (BSI) specifically for providing imaging core lab services on clinical trials.

"Intrinsic Imaging was selected for this pivotal study due to our team's oncology expertise and our operational excellence and efficiency in conducting clinical trials," said Todd Joron, President and COO at Intrinsic Imaging. "We were confident in our risk assessment and planning of this study and we are proud to have delivered this pivotal data to our client on time as planned."
