Intrinsic Imaging Awarded Phase II Clinical Trial for Cardiovascular Disease

Cardiac MRI review and analysis for an international Phase II trial assessing safety and tolerability of a novel cardiovascular drug.

Bolton, MA / San Antonio, TX

Bolton, MA / San Antonio, TX — September 5, 2013 — Intrinsic Imaging, an FDA audited, ISO 9001 and ISO 13485 certified medical imaging core lab specializing in providing imaging core lab services for clinical trials, announced today that it has been awarded an international Phase II clinical trial to assess cardiac safety and tolerability of a novel drug.

Throughout this trial, Intrinsic Imaging will provide comprehensive imaging core lab services including specialized radiologic review and analysis of images collected using Cardiovascular Magnetic Resonance Imaging (Cardiac MRI).

Cardiac MRI enables the assessment of key functional and morphological features of the cardiovascular system. Intrinsic Imaging's cardiovascular team are experts in using Cardiac MRI to assess cardiac function, deposition diseases, cardiomyopathies, pericardial disease, valvular heart disease, congenital heart disease and diseases of the aorta and great vessels.

Intrinsic Imaging has extensive experience in cardiovascular disease. The team includes cardiologists board certified in echocardiography, and board-certified radiologists with multi-modality expertise. In addition to Cardiac MRI, the team has expertise in ultrasound, nuclear imaging, positron emission tomography (PET), invasive angiography and computed tomography (CT) including novel techniques such as Adenosine Stress MRI.

"At Intrinsic Imaging, our team has specialized training and expertise in adult and pediatric cardiovascular disease, and are able and willing to guide Sponsors in designing their imaging protocols as well as in providing clinical image management and radiological review for their cardiovascular clinical trials." said Todd A. Joron, BSc. MBA, President and Chief Operating Officer, Intrinsic Imaging.

About Intrinsic Imaging, LLC

Intrinsic Imaging is an ISO certified medical imaging CRO and imaging core lab providing comprehensive services in support of Phase I-IV clinical trials and Class I, II, III medical device trials. Intrinsic Imaging is also a world leader in conducting Artificial Intelligence studies. With its team of more than 750 board-certified and fellowship-trained physicians, Intrinsic Imaging's team has sub-specialization in all therapeutic areas, including Cardiovascular, Central Nervous System,Gastroenterology, Musculoskeletal, Oncology and Ophthalmology. Certified by the British Standards Institution (BSI), Intrinsic Imaging is the only company in the world to hold five ISO certifications specifically for providing imaging core lab services on clinical trials.
