Intrinsic Imaging Awarded Genitourinary Medical Device Clinical Trial

Clinical trial for the evaluation of a genitourinary medical device for the treatment of urinary incontinence.

Bolton, MA / San Antonio, TX

Bolton (MA), San Antonio (TX), August 12, 2014 — Intrinsic Imaging, LLC, an FDA audited, ISO 13485 and ISO 9001 certified medical imaging core lab specializing in providing imaging core lab services for clinical trials, announced today that the company has been awarded a clinical trial for the evaluation of a Genitourinary Medical Device for the treatment of urinary incontinence.

Intrinsic Imaging's full time team of more than sixty board-certified diagnostic radiologists have subspecialization in all therapeutic areas including, but not limited to Genitourinary, Cardiovascular, Central Nervous System, Gastrointestinal, Medical Device, Musculoskeletal, Respiratory and Oncology.

Intrinsic Imaging's team of board-certified, fellowship-trained radiologists, are responsible for a broad range of assessments and evaluations of medical devices across the range of therapeutic areas including but not limited to catheters, filters, stents, angioplasty balloons, thrombectomy devices, venous access tools and novel next generation devices.

Throughout this trial, Intrinsic Imaging will use its expertise in evaluating medical devices to provide comprehensive medical imaging core lab services as well as the specialized radiologic review of genitourinary pelvic floor images captured using dynamic MRI.

"Intrinsic Imaging is the only ISO 13485 certified imaging core lab specifically certified to provide quality imaging core lab services for medical device clinical trials," said Todd A. Joron, BSc. MBA, President and Chief Operating Officer, Intrinsic Imaging. "When you couple our interventional radiology experience with our ISO certified quality management system, Intrinsic Imaging is able to provide Sponsors with unprecedented expertise in the management of their medical device clinical trial."

Intrinsic Imaging's medical device certification was granted by the British Standards Institution (BSI), one of the world's largest certification bodies. Intrinsic Imaging's ISO 13485 certification demonstrates Intrinsic Imaging's ability to provide quality imaging core lab services that consistently meet customer and regulatory requirements applicable specifically to medical devices.

About Intrinsic Imaging, LLC

Intrinsic Imaging is an ISO certified medical imaging CRO and imaging core lab providing comprehensive services in support of Phase I-IV clinical trials and Class I, II, III medical device trials.
