Intrinsic Imaging Awarded a Validation Study for the Development of an Innovative Medical Device to Aid in the Evaluation of Gastrointestinal Motility

Intrinsic Imaging selected for its operational excellence and extensive therapeutic experience in imaging core lab services for medical devices.

Bolton, MA / San Antonio, TX

Intrinsic Imaging, a full-service medical imaging core lab providing comprehensive services in support of clinical trials and medical device trials, announces today the award of another validation study for the development of an innovative medical device designed to aid in the evaluation of gastrointestinal motility.

Intrinsic Imaging has extensive experience in medical device imaging, and in particular, imaging protocol development for medical devices. The protocol design for this trial was written in collaboration with Intrinsic Imaging's Chief Medical Officer, Amit Mehta, M.D., and was designed specifically to limit patient exposure to radiation.

Throughout this trial, Intrinsic Imaging will provide comprehensive imaging core lab services including protocol guidance, study management, study design, site qualification and training, image review and advanced cloud-based technology data processing. With its portfolio of five ISO certifications, Intrinsic Imaging has the most comprehensive and sophisticated quality management system in the industry.

"Intrinsic Imaging is an industry leader in conducting medical device imaging trials," said Todd Joron, President and COO at Intrinsic Imaging. "We are extremely pleased to be a critical partner in this innovative medical device trial."

About Intrinsic Imaging, LLC

Intrinsic Imaging is an ISO certified medical imaging CRO and imaging core lab providing comprehensive services in support of Phase I-IV clinical trials and Class I, II, III medical device trials. Intrinsic Imaging is also a world leader in conducting Artificial Intelligence studies. With its team of more than 650 board-certified and fellowship-trained physicians, Intrinsic Imaging’s team has sub-specialization in all therapeutic areas, including Cardiovascular, Central Nervous System,Gastroenterology, Musculoskeletal, Oncology and Ophthalmology. Certified by the British Standards Institution (BSI), Intrinsic Imaging is the only company in the world to hold five ISO certifications specifically for providing imaging core lab services on clinical trials.
