Intrinsic Imaging Awarded GIST Clinical Trial for the Treatment of Gastrointestinal Stromal Tumors

Intrinsic Imaging selected for its operational excellence and extensive therapeutic experience in gastrointestinal stromal tumors.

Bolton, MA / San Antonio, TX

Bolton, MA, San Antonio, TX, April 4, 2017 — Intrinsic Imaging, LLC, an FDA audited and ISO certified medical imaging core lab with extensive therapeutic experience and operational excellence in oncology clinical trials, proudly announces today that it has been awarded a multi-year clinical trial for the treatment of gastrointestinal tumors (GIST).

Throughout this trial, Intrinsic Imaging will provide comprehensive core lab services including, but not limited to, study management, protocol and charter development, image quality control and image processing. In addition, Intrinsic Imaging's full-time board-certified, fellowship-trained radiologists will also evaluate the patients' tumor response according to the Response Evaluation Criteria in Solid Tumors (RECIST) v1.1 and Choi criteria.

"Intrinsic Imaging has extensive therapeutic experience and operational excellence in gastrointestinal stromal tumor clinical trials," said Todd A. Joron, BSc., MBA, President & COO at Intrinsic Imaging. "Intrinsic Imaging is proud to provide our expertise in the development of a novel therapeutic for GIST patients."

Within its team of 70 full-time, board-certified radiologists, Intrinsic Imaging's oncology group consists of 12 radiologists with an extensive breadth of experience in clinical trials involving carcinomas, sarcomas, myelomas and lymphomas. The oncology team also has significant expertise in a range of assessment criterion including, but not limited to, BIRADS, Cheson, Choi, irRECIST, Lugano, Macdonald, mRecist, PERCIST, RANO and RECIST.

Stromal or mesenchymal neoplasms affecting the gastrointestinal tract can present as gastrointestinal stromal tumors (GISTs). GISTs are most often located in the stomach and proximal small intestine, but can occur in any portion of the alimentary tract including occasionally in the omentum, mesentery and peritoneum.

About Intrinsic Imaging, LLC

Intrinsic Imaging is an ISO certified medical imaging CRO and imaging core lab providing comprehensive services in support of Phase I-IV clinical trials and Class I, II, III medical device trials. Intrinsic Imaging is also a world leader in conducting Artificial Intelligence studies. With its team of more than 650 board-certified and fellowship-trained physicians, Intrinsic Imaging’s team has sub-specialization in all therapeutic areas, including Cardiovascular, Central Nervous System,Gastroenterology, Musculoskeletal, Oncology and Ophthalmology. Certified by the British Standards Institution (BSI), Intrinsic Imaging is the only company in the world to hold five ISO certifications specifically for providing imaging core lab services on clinical trials.
