Intrinsic Imaging Opens Medical Imaging Office in Greater Boston

New Greater Boston imaging office expands operations alongside Intrinsic Imaging's San Antonio location to support international clinical trials.

Bolton, MA / San Antonio, TX

Bolton, MA / San Antonio, TX — February 26, 2013 — Intrinsic Imaging, an FDA audited, imaging core lab specializing in providing imaging core lab services for clinical trials, announces today that in addition to its current offices in San Antonio, Texas, it is expanding its operations and opening an ISO 9001 and ISO 13485 certified medical imaging office in Greater Boston, Massachusetts. This new imaging office will enable Intrinsic Imaging to continue to be one of the most technology advanced, high-throughput and regulatory compliant medical imaging core labs in the world.

Intrinsic Imaging's expansion is the result of its continued global success as a premier quality imaging core lab providing clinical management and radiology review services to pharmaceutical, biotechnology, medical device and clinical research organizations that are conducting clinical trials.

From the inception of Intrinsic Imaging, the company has invested in the implementation of effective quality management processes that have enabled it to surpass the needs of its clinical trial Sponsors and the requirements of the Food and Drug Administration (FDA) and other regulatory bodies.

Intrinsic Imaging new investment in its new medical imaging campus further provides the quality, technology, scalability and robustness to support Intrinsic Imaging's expanding portfolio of large international Phase II and Phase III drug and device clinical trials.

"The opening of our new imaging campus is one of a series of recent achievements for Intrinsic Imaging. We most recently completed a thorough audit by the FDA and were found to be in complete compliance with all federal regulations and we received zero 483 observations from the agency." said Todd A. Joron, BSc, MBA, President & COO at Intrinsic Imaging. "Further, our quality management system successfully attained ISO 9001:2008 and ISO 13485:2003 certifications from the British Standards Institution (BSI), one of the world's largest, most respected and reputable quality management systems certification bodies."

Intrinsic Imaging's new office campus sits on 100 acres of scenic countryside on beautifully landscaped grounds in the picturesque community of Bolton, Massachusetts. Chosen to promote a healthy employee working environment and ease of commute, Intrinsic Imaging's campus is surrounded by diverse wooded areas, ponds and walking paths and its offices feature modern styling with an internal natural light courtyard. All of Intrinsic Imaging's operations will now be centered at its new campus and all national and international clinical trials will be managed from this location.

With its team of more than sixty full time board-certified diagnostic radiologists, its robust and scalable clinical imaging technologies and its ISO certified and registered quality management system, Intrinsic Imaging is ideally positioned to provide unprecedented imaging core lab services around the world. Intrinsic Imaging's services are comprehensive and include, but are not limited to, expert radiologist consultation, protocol and charter development, site qualification, training and management, as well as image acquisition, processing, detailed radiologic review and analysis.

Intrinsic Imaging is currently seeking qualified candidates at this location. Select open positions include Imaging Associates, Imaging Research Associates, Medical Writers, Project Managers and Study Directors.

About Intrinsic Imaging, LLC
