Intrinsic Imaging Awarded Medical Device Trial for Percutaneous Tumor Ablation

Interventional medical device trial evaluating percutaneous ablation of cancerous tumors.

Boston, MA

Boston, MA — April 23, 2015 — Intrinsic Imaging, an FDA audited, ISO 9001:2008 and ISO 13485:2003 certified, GAMP® 5 compliant medical imaging core lab specializing in providing services for clinical trials, announced today that it has been awarded a clinical trial to study an interventional medical device designed for the percutaneous ablation of cancerous tumors.

Intrinsic Imaging will provide comprehensive imaging core lab services. As the evaluation of loco-regional ablative techniques requires significant expertise in multimodal ablation zone evaluation, Intrinsic Imaging's board-certified fellowship-trained interventional radiologists will also provide guidance to the Sponsor on the imaging charter, optimal image acquisition parameters and the most reliable and reproducible imaging endpoints to assess pre- and post-tumor ablation findings.

Image-guided percutaneous tumor ablation is a technique of controlled, direct destruction of cells and tissue with the end goal of complete tumor destruction. Ablative therapy can be performed for both primary and metastatic tumors. The spectrum of ablation therapies encompasses techniques such as radiofrequency ablation (RFA), cryoablation, laser ablation, microwave ablation, high-intensity focused ultrasound, and irreversible electroporation.

About Intrinsic Imaging, LLC

Intrinsic Imaging is an ISO certified medical imaging CRO and imaging core lab providing comprehensive services in support of Phase I-IV clinical trials and Class I, II, III medical device trials. Intrinsic Imaging is also a world leader in conducting Artificial Intelligence studies. With its team of more than 650 board-certified and fellowship-trained physicians, Intrinsic Imaging’s team has sub-specialization in all therapeutic areas, including Cardiovascular, Central Nervous System,Gastroenterology, Musculoskeletal, Oncology and Ophthalmology. Certified by the British Standards Institution (BSI), Intrinsic Imaging is the only company in the world to hold five ISO certifications specifically for providing imaging core lab services on clinical trials.
